The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For performance current to the most recent month end, please call 833-601-2676. CVRDX has a gross expense ratio of 4.05% and a net expense ratio of 1.15%, which is contractually agreed upon until March 31, 2024.

The S&P 500® Index is a market capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market. Unlike mutual funds, the index does not incur expenses. If expenses were deducted, the actual returns of this index would be lower.

The CBOE S&P 500 BuyWrite Index (BXM) is a passive total return index based on (1) buying an S&P 500 stock index portfolio, and (2) "writing" (or selling) the near-term S&P 500 Index (SPX) "covered" call option, generally on the third Friday of each month. An investor cannot invest in an index and index returns are not indicative of the performance of any specific investment.
